Purpose
<p>Medical policies provide general support for applying Mountain Health Co-Op member policy document coverage decisions and must reference the member-specific benefit plan document. The terms of the member-specific Policy document may differ from the standard benefit plan on which this medical policy is based. If there is a conflict between a member-specific policy document and the Mountain Health Co-Op medical policy, the member-specific policy document supersedes this medical policy. Any person(s) applying this medical policy must identify member eligibility, the member-specific policy document, and related policies or guidelines before applying this medical policy, including the existence of any state or federal guidance. Mountain Health Co-Op medical policies are designed for informational purposes only and are not an authorization, explanation of benefits, or contract. Receipt of benefits is subject to satisfaction of all terms and conditions of the member-specific policy document coverage. Mountain Health Co-Op reserves the sole discretionary right to modify all policies and guidelines at any time.</p>

Definition
<p>Mountain Health Co-Op members may choose to receive surgical procedures in an ambulatory surgical center (ASC) or other locations. We are conducting site of service medical necessity reviews, however, to determine whether the outpatient hospital department is medically necessary, in accordance with the terms of the member’s benefit plan. If the outpatient hospital department is not considered medically necessary, this location will not be covered under the member’s plan.</p>

Policy/Procedure
Policy/Procedure:

Certain planned surgical procedures performed in a hospital outpatient department are considered medically necessary for an individual who meets any of the following criteria:

- Advanced liver disease (MELD Score > 8)
- Advance surgical planning determines an individual requires overnight recovery and care following a surgical procedure
- Anticipated need for transfusion
- Bleeding disorder requiring replacement factor or blood products or special infusion products to correct a coagulation defect
- Cardiac arrhythmia (symptomatic arrhythmia despite medication)
- Chronic obstructive pulmonary disease (COPD) (FEV1 < 50%)
- Coronary artery disease (CAD)/peripheral vascular disease (PVD) [ongoing cardiac ischemia requiring medical management or recently placed (within 1 year) drug eluting stent]
- Developmental stage or cognitive status warranting use of a hospital outpatient department
- End stage renal disease [(hyperkalemia above reference range) receiving peritoneal or hemodialysis]
- History of cerebrovascular accident (CVA) or transient ischemic attack (TIA) [recent event (< 3 months)]
- History of myocardial infarction (MI) [recent event (< 3 months)]
- Individuals with drug eluting stents (DES) placed within one year or bare metal stents (BMS) or plain angioplasty within 90 days unless acetylsalicylic acid and antiplatelet drugs will be continued by agreement of surgeon, cardiologist, and anesthesia
- Ongoing evidence of myocardial ischemia
- Poorly Controlled asthma (FEV1 < 80% despite medical management)
- Pregnancy
- Prolonged surgery (> 3 hours)
- Resistant hypertension (Poorly Controlled)
- Severe valvular heart disease
- Sleep apnea [moderate to severe Obstructive Sleep Apnea (OSA)]
- Uncompensated chronic heart failure (CHF) (NYHA class III or IV)
- Uncontrolled diabetes with recurrent diabetic ketoacidosis (DKA) or severe hypoglycemia
- Under 18 years of age

A planned surgical procedure performed in a hospital outpatient department is considered medically necessary if there is an inability to access an ambulatory surgical center for the procedure due to any one of the following:

- An ASC's specific guideline regarding the individual's health conditions or weight that would preclude management of an individual within an ASC setting; or
- There is no geographically accessible ambulatory surgical center that has the necessary equipment for the procedure [examples include but are not limited to fluoroscopy, laser, ocular equipment, operating microscope, and nonstandard scopes required to perform specialized procedures (i.e., duodenoscope, ureteroscope)*]; or
- There is no geographically accessible ambulatory surgical center available at which the individual's physician has privileges

***Note:** This specifically excludes surgeon preferred or proprietary instruments, instrument sets, or hardware sets.

The following list of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.
